

BLUE RENEW*

Wrap Recycling Program

Daniel Constant, Sustainable Solutions

BLUE RENEW* Wrap Recycling

For HALYARD* Sterilization Wrap

- Step-by-step program to assist healthcare facilities to successfully recycle HALYARD* Wrap.
- Organizes the process of wrap recycling into five achievable stages.
- The Halyard BLUE RENEW* Team will work with hospitals to identify key recycling partners, train OR teams and help measure results to achieve a sustainable wrap recycling program.

BLUE RENEW* Wrap Recycling Program Elements

- Overview
- Checklist
- Program Posters
- Collection Bin Labels
- Approved Vendors
- Dedicated BLUE RENEW* Team

BLUE RENEW* Wrap Recycling Program In Motion

OR Segregates

Environmental Services segregates HALYARD* Wrap to be recycled.

BLUE RENEW* Wrap Recycling Program In Motion

Pre-check for contaminants before collector picks-up material.

Collector or hospital bales material.

One way to recycle is to re-process wrap back into pellets for future use.

A Lifecycle View

BLUE RENEW* Wrap Recycling

What's to Put in CLEAR Recycling Bags

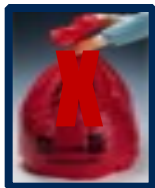

✓ Recyclable Items

Place all clean approved plastics into clear recycling bag
PRIOR TO INCISION

✗ Non-Recyclable Items

DO NOT place these items into clear recycling bag,
but into appropriate containers. All these plastics
are considered non-recyclable **POST INCISION**

BLUE RENEW* Wrap Recycling

IMPORTANT NOTE

The BLUE RENEW Wrap Recycling initiative is designed to assist your facility in understanding the steps needed to successfully recycle HALYARD* Wrap with KIMGUARD* Fabric technology.*

IMPORTANT: It is the responsibility of your facility to initiate the recycling program, train your staff, and monitor the cleanliness and safety of all material leaving your facility. Halyard Health assumes no responsibility for material placed in the waste stream.
